Confirmed - Infrashore Consortium will deliver Royal North Shore Hospital and Community Health Services Project

The New South Wales Government has reached a financial close with the InfraShore Consortium (InfraShore), led by Thiess Pty Ltd and ABN AMRO Australia Pty Limited, in a contract to deliver the Royal North Shore Hospital and Community Health Services Project.

InfraShore brings together the expertise of leading infrastructure providers including Thiess (Sponsor and Design and Construction Contractor), Thiess Services (Facilities Management - building, plant and equipment maintenance etc) ABN AMRO (Sponsor and Financier), and ISS Facilities Management (Catering, cleaning, security personnel etc).

Thiess Managing Director David Saxelby said the project is the largest-ever health Public Private Partnership undertaken in New South Wales. Thiess will achieve revenues of \$721M in the design and construction phase and \$409M over the 28 year concession period.

"We bring solid experience and success in delivering state of the art hospital infrastructure. We look forward to working closely with our partners to deliver a world class facility that the people of New South Wales will be proud of for a long time," Mr Saxelby said.

Infrashore will bring together all the acute clinical services currently spread across the hospital and will create an integrated hospital that offers ease of access for patients, families and visitors while supporting effective patient flow and minimising travel times.

Thiess General Manager NSW/ACT, Brendan Donohue, said the project would be delivered in four stages and has re-affirmed Infrashore's pledge of maximum consultation and minimal disruption to hospital functions.

Earlier this year, Thiess was commended for completing the four-year Westmead Hospital upgrade, months ahead of schedule, and fully integrated within an operating facility.
